## GMC-GANGXIN 1736 — 1700 x 3660

 <p><b>GANGXIN</b></p>	
<p><b>Luoyang GANGXIN Glass Technology China</b></p>	<p><b>GMC For Glass Industry France</b></p>

**Flat Tempering equipment**  
**French – Chinese co-operation**  
**to your advantage**

On September 20<sup>th</sup> 2013 the companies **GMC For Glass Industry** and **Luoyang GANGXIN Glass Technology** have signed an official agreement for the European and CIS ( previous Soviet countries ) markets, with respectively the following obligations:

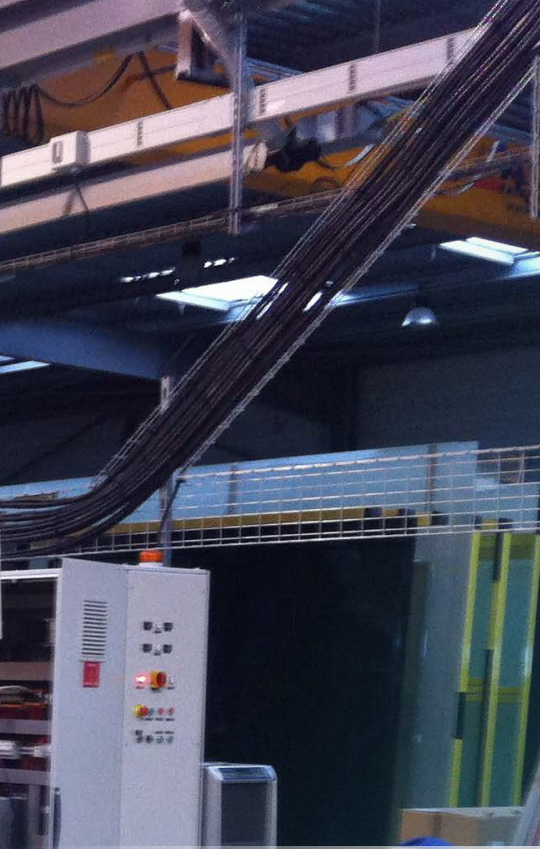

**GANGXIN** company, with more than 8 years existence, will design and produce the Tempering Equipment sections.

**GMC For Glass Industry**, with more than 22 years existence, will design and provide the Tempering Equipment control system, as well as local service.

Both companies having a great number of references on this market and long time experience in this field, have the willingness to develop sales, providing a Tempering Equipment with mutual technical improvements for the benefit of glass quality, float and low E glass, productivity, energy consumption saving and equipment reliability, providing service either from French office or Polish office.
